

# LIBERTY LINK

## Partnering to Power New York's Clean Energy Future

Viridon New York's Liberty Link Project will leverage state-of-the-art technology to collect and integrate offshore wind energy into New York City's electric grid – delivering enough clean, renewable energy to power over 5 million homes. Liberty Link is one of several being considered by the state to achieve New York's ambitious clean energy goals.

### Authentic engagement with government and stakeholders

While helping to meet New York's energy goals, we prioritize the voices of local and affected communities, working closely with government agencies, environmental and environmental justice organizations, labor and business groups, and other local stakeholders in a transparent and inclusive process.

### The expertise, resources, and financial strength to deliver

Liberty Link brings together a world-class team with deep expertise in the electric transmission industry. Our team members have successfully designed and implemented projects of comparable scale and scope in New York and beyond. Backed by one of the world's largest and strongest financial institutions, we stand ready to deliver for New York.

### Positive outcomes for customers, communities, and the environment

With a proven track record of completing innovative, large-scale transmission projects that integrate cleaner energy into our nation's electric grids. Along the way, our team has consistently met or exceeded the expectations of customers while ensuring tangible benefits for local stakeholders and their communities.

**SUBMISSION**  
JUNE 17, 2024

**VIABILITY & SUFFICIENCY**  
2024

**EVALUATION & SELECTION**  
2024 - 2025

**PERMITTING & CONSTRUCTION**  
2026 - 2032

**IN-SERVICE**  
JANUARY 1, 2033

## A PROCESS THAT INCLUDES AND BENEFITS THE PUBLIC

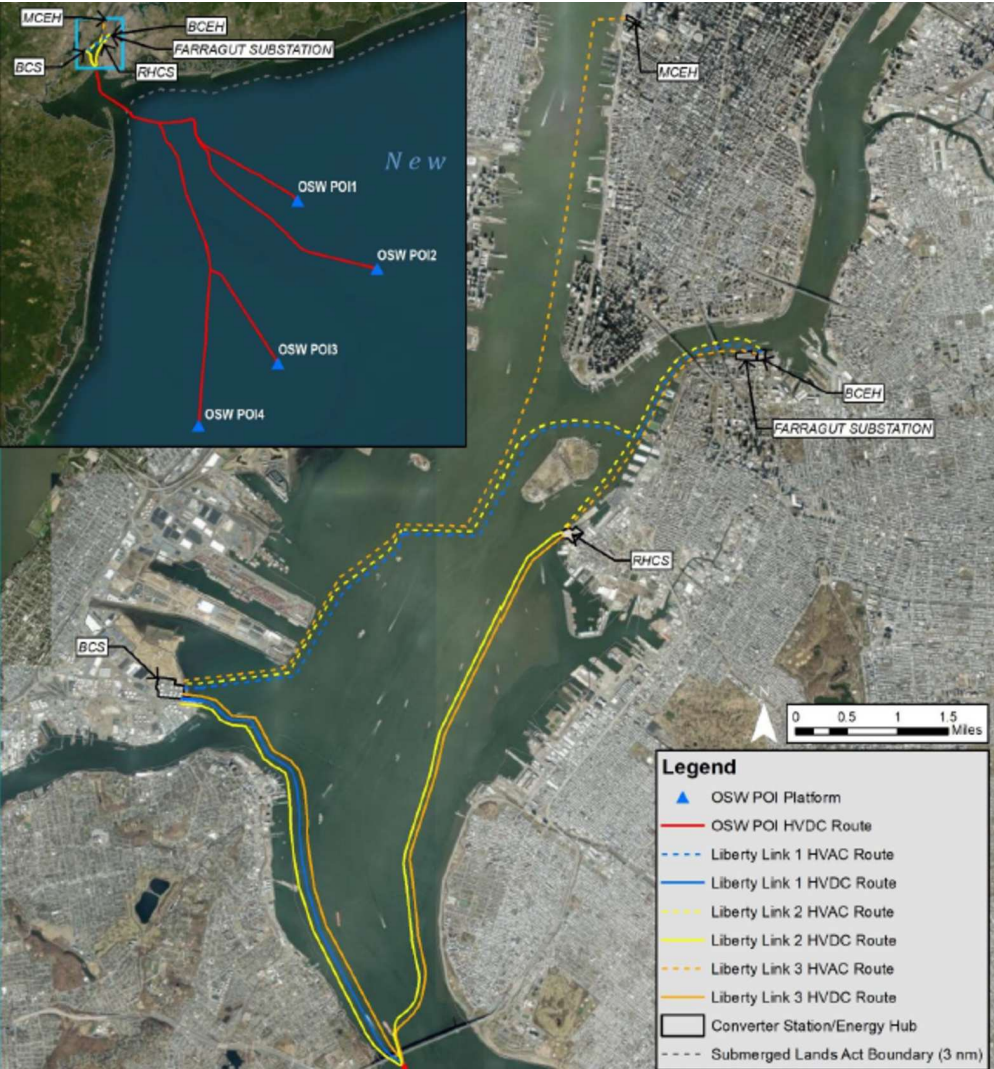

## ROUTING & PERMITTING

**Feasibility** – When developing our route to help New York meet its clean energy goals, we conducted an in-depth routing study that adhered to NYSERDA guidance and the NYPSC and best minimized impacts to the built environment, infrastructure, and the natural environment while still being permissible and feasible to construct.

**Collaboration** – Our process combined meetings with federal and state agencies and advanced GIS analysis, site visits, and input from local experts to avoid and minimize impacts on sensitive ecosystems and existing infrastructure while addressing future development needs like harbor deepening.

**Community Focused** – Throughout this process, we are committed to working closely with the local communities to refine our routes and approach, ensuring that community input is considered as we minimize disruptions and maximize the benefits to New York.

## Viridon NY is more than just a company – we're your dedicated partner.

Viridon New York's Liberty Link project is committed to delivering sustainable, local energy solutions that prioritizes New York communities and advances the state's clean energy goals.

**Jobs** – create jobs for local workers during the construction phase as well as long-term employment opportunities in operations and maintenance.

**Community Partnership** – establish meaningful and transparent partnerships with New York communities and their leaders to support local community projects and avoid disruptions

**Improve air quality** – reduces the reliance on fossil fuels and lowers greenhouse gas emissions, thereby making the air that New Yorkers breath cleaner and healthier

**Reliability and Resiliency** – improve the reliability of the local power grid by enabling the diversification of energy resources, ensuring New Yorkers have a stable energy supply. Strengthen the grid so that clean energy can be distributed efficiently to New Yorkers in a cost-efficient manner.
